

plant pot, the (supports) posts separate each other, and not hollow, the at least one (support) making enough space for reserving fluid in the tray.

2-26. (canceled)

27. (currently amended) A self watering tray for a plant pot, comprising:

a (plate) tray, the (plate) tray having side walls and a bottom wall, the (plate) tray holding fluid; and

at least one leg coupled to the (plate) tray, the at least one leg having two sections, up section and low section, the up section is smaller than the low section, (each of them) the low section having a closed side wall, a shoulder between the up section and the low section supporting the plant pot.

28. (canceled)

29. (currently amended) The tray of claims 1, further comprising a fluid intake lip, the fluid intake lip disposed on the side walls of the (plate) tray, so that fluid can easily be added into the (plate) tray through the fluid intake lip.

30-43. (canceled)

44.(currently amended) The tray of claim 27, wherein the at least one leg filled with a fluid sucking material which provides a fluid conduit capable of sucking fluid from the (plate) tray.

45. (previously presented) The tray of claim 27, wherein a wick is accompanied while the at least one leg can not be filled fluid sucking material.

46. (canceled)

47. (currently amended) The tray of claim 1, further comprising a wick, the wick provides a fluid conduit capable of sucking fluid from the (plate) tray.

48. (previously presnted) The tray of claim 47, further comprising a tube, the wick

insert into the tube.

49. (currently amended) The tray of claim 27, further comprising a fluid intake lip, the fluid intake lip disposed on the side walls of the (plate) tray, so that fluid can easily be added into the plate through the fluid intake lip.

50. (previously presented) The tray of claim 29, wherein the at least one support having second section, the second section extending upwardly from the support.

51. (new) The tray of claim 27, further comprising a bottom wall on low section of the at least one leg, at least one hole disposed on/or near the bottom wall for fluid communication in and out of the leg.

52. (new) The tray of claim 27, further comprising a pad under the leg for standing more stable on the tray bottom.

53. (new) A self watering tray for a plant pot, comprising:

a tray, the tray having a side wall and a bottom wall, the tray holding fluid; and

at least one leg, the at least one leg formed by at least three wings, the at least one three wing leg coupled to the tray for supports a plant pot.

54. (new) The tray of claim 53, wherein a pad disposed under the three wing leg for standing in the tray more stable.

55. (new) The tray of claim 53, wherein the three wing leg extending upwardly from the bottom wall of the tray.

56. (new) The tray of claim 53, wherein an up section extending upwardly from the three wing leg.
